Professional Summary

Pre-final-year Civil Engineering student at SVNIT with hands-on experience in digital marketing, AI-powered applications, DevOps, cloud computing, database management, and full-stack development. Developed and deployed real-world applications including an AI-powered Health Report Analyzer, an AR-enabled restaurant POS system, and an AI-powered Human Resource Management System using React.js, Node.js, Neon, and cloud technologies.

- **Core Coursework:** Data Analytics, Artificial Intelligence Techniques, Structural Analysis, Design of Steel Structures

Education

Sardar Vallabhbhai National Institute of Technology (SVNIT) Surat, India
B.Tech. in Civil Engineering *Aug 2024 – May 2028*

Projects

3D AR-Based Restaurant POS System **GitHub** *2026*
Frontend Developer
React.js, Node.js, Express.js, Amazon S3, Blender, Tailwind CSS

- Built an **AR-enabled restaurant POS system** with interactive 3D food visualization, digital menu, ordering, and billing workflows.
- Developed RESTful backend APIs using **Node.js, Express.js, and AWS S3** for menu, order, and restaurant data management.
- Integrated **Three.js and Blender** 3D assets to enable interactive 3D food visualization within a responsive React.js frontend.
- Pitched the solution to **50+ cafes and restaurants**, conducting client outreach, gathering market feedback, and validating real-world business requirements.

HealthSaral - AI-Powered Health Report Analyzer **GitHub** **www.healthsaral.in**
Developer / AI-Assisted Developer, Cloudflare Workers, Cloudflare R2, Supabase, SEO, *2026*
Google Cloud, Astro

- **Achieved 20 daily active users** through consistent organic traffic, with approximately 15 users per day using AI-powered report simplification to convert complex medical reports into easy-to-understand language.
- Integrated **Integrated the Gemini API** for document processing, information extraction, and structured JSON generation.
- Implemented secure medical report storage using **Cloudflare R2, presigned URLs,** and role-based access control to protect sensitive health data and ensure privacy.
- Improved frontend performance through **lazy loading, caching, responsive UI design**, and optimized API interactions.

HRMS – Human Resource Management System **GitHub**
React.js, Node.js, Neon, REST APIs, Google Gemini API, Cloudflare, Cloudinary, Docker, CI/CD

- Developed a **full-stack HR management platform** with role-based Admin and Employee dashboards for employee management, attendance, leave, payroll, and HR workflows.
- Integrated **Google Gemini-powered HR chatbot** and **Google Cloud Vision API (OCR)** for intelligent employee onboarding and automated data extraction.
- Implemented **payroll anomaly detection, attendance analysis, and automated notifications** to improve HR operational efficiency.

Technical Skills

Languages: C++, Python, C, HTML5, JavaScript, CSS3, Tailwind CSS
Digital Marketing: SEO, Semrush, Google Ads (Search, Display), Keyword Research & Optimization, Conversion Tracking (GA4, GTM), CTR, CPC, CPA Analysis, Campaign Optimization, On-Page SEO, Local SEO, Data Analysis & Reporting, Microsoft Excel, Google Sheets
Cloud & DevOps: AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, GitHub Actions, CI/CD, Cloudflare
Databases: MySQL, Neon, NoSQL, MongoDB
Tools: Power BI, MySQL Workbench, Git, GitHub, Postman, Cloudinary, Jira, Supabase, Figma (UI/UX)
Civil Engineering Software: AutoCAD, STAAD.Pro, ETABS
AI/ML: Fuzzy Set Theory, Artificial Neural Networks (ANNs), Hugging Face

Achievements & Certifications

- Secured admission to SVNIT Surat through JEE Main 2024
- Deloitte Cyber Job Simulation – Forage(Certificate)
- Skyscanner FrontEnd Software Engineering Job Simulation – Forage(Certificate)
- Semrush Academy AI Search Operating System(Certificate)
- AI Tool Workshop- be10x(Certificate)
